Science Teaching Workshop

2007

March 17th, 2007

Cornell Center for Materials Research

Cornell University

Cornell University
Cornell Center for Materials Research
Educational Programs Office
Ithaca, NY 14853-2501

The Objective:

The CCMR Science Teaching Workshop is designed for Cornell students interested in the field of teaching. This workshop deals specifically with teaching sciences, but is not limited to any particular student age group.

In-service elementary, middle, and high school teachers, as well as college instructors, will share their experiences in the field

of teaching and participants will share ideas and reflections from their own experience.

The workshop hopes to better prepare

participants to develop activities for students of all ages, participate in educational outreach activities and make a more informed decision about entering the field of teaching.

Professor Stan Chu, teacher educator at the Bank Street College of Education, will present an introduction to "investigations," an approach to science education that focuses on hands-on experience and can be used with all age groups.

Participants will also be invited to attend a follow-up workshop, in May, focused specifically on developing activities and lesson plans.

The Workshop Day:

9:00am	Coffee and Introduction
9:30am	Workshop with Prof. Barbara Crawford and Prof. Dawn Schrader <i>The Art of Teaching</i>
10:30am	Workshop with Prof. Travis Park <i>Reading in the Sciences</i>
11:30am	Lunch/Teacher Panel
1:00pm	Workshop with Prof. Stan Chu <i>Investigations in Science</i>

Eligibility:

All Cornell undergrads and graduate students interested in the teaching of science at all levels are welcome to register. Space will be reserved for the first 30 forms received.

Registration:

To register, please fill out the form below and return to:
