

## Engineer / Sr. Scientist

We are a startup biotechnology company based in Ithaca, NY that offers the opportunity to work with a talented team of scientists in developing novel tools for life sciences.

**The Company:** CyteQuest is developing a unique flow electroporation platform to revolutionize the treatment of disease by adoptive immunotherapy.

**The Position:** We're looking for an engineer / scientist with expertise in designing and building analog and digital circuits. Candidates with a Masters or PhD degree, or BS with comparable experience, in an engineering field or equivalent with experience in fluidics, microfabrication, and cell biology will be preferentially considered. CyteQuest can offer a stimulating work environment and competitive salary commensurate with experience.

### Requirements:

- Support the development of CyteQuest's electroporation platform
- Be familiar with methods for designing and testing AC waveforms
- Analyze results of experiments to measure efficiency and viability of CyteQuest's electroporation platform
- Develop and maintain detailed laboratory documentation, including tests, reports, and notebook entries
- Familiarity with a data analysis software package, like Scientific Python
- Ability to work independently and in small groups

Please respond with a resume to [info@cytequest.com](mailto:info@cytequest.com)

CyteQuest is an equal opportunity employer.
