Advanced Lab Tech Sought

Fuera Technologies Inc (FTI) is looking for people with outstanding laboratory skills to work part- or full-time on a project to investigate structure and properties of materials in integrated circuit devices. Successful candidates will have demonstrated laboratory skills including attention to detail, adherence to safety protocols, and documentation (graphical and written). Experience in one or more of: chemical lab work, sample preparation, SEM, EDS, and/or other materials characterization techniques is required. 20-40 hours/week ±. Work hours are flexible. Must be able to work in CCMR, CNF, and/or other facilities at Cornell. ~ $50/hr (depending on specific skill set). Ideal for senior graduate students or recent graduates looking for short term funding and/or experience. Contact Shef Baker: shef@fueratech.com.
